Air Purifier KS-GA100

HEPA Filter with 3-stage filtration / Motion Activated Controls / Portable enough for the car cup holder

*Clean Air Delivery Rate

Classy-Look Aluminum Body & Compact Size Fits Easily in Cupholder

Quickly Purify and Deodorize Your Car's Interior

Releases negative ions and deodorizes unpleasant smells in the car.

A high-performance HEPA filter efficiently collects PM2.5*, pollen, and fine dust, at a particle capture rate of 99.5%.

*PM2.5 are defined as fine inhalable particles, with diameters that are generally 2.5 micrometers and smaller.

Motion Activated Controls

Easily adjust the wind speed by shaking your hand above the purifier. Shake once to enter low speed mode, then shake again to switch to high speed mode, which deodorize rapidly. Shaking a third time will turn off the power.

2020 PRODUCT GUIDE

Winter / Spring

Smartphone Integration

Apple CarPlay™ - Connect Wirelessly or via USB

A smarter, safer and more fun way to use your iPhone in the car. Apple CarPlay gives iPhone users an intuitive way to make calls, use Maps, and listen to music with just a word or a touch. With the latest iOS version (iOS 13.0 and higher), 3rd party navigation apps like Google Maps™ and Waze™ are supported.

Some features, applications, and services are not available in all areas. For details, see: www.apple.com/ios/feature-availability/#applecarplay-applecarplay

Wireless Mirroring for Android Phones

Wireless Mirroring for Android Solution for seamlessly displaying and controlling your smartphone apps on a screen without cables on select Android devices. *Selected models only

Amazon Alexa Compatible

You can talk to Amazon Alexa on your JVC Receivers. With Alexa Built-in, you can ask to play music, place calls, listen to audiobooks, hear the news, check the weather, control smart home devices, get directions, find parking, and more - all while you keep your hands on the wheel and eyes on the road.

Available Functions

- Play Music
- Check Weather
- Check Local News
- Question about general things
- Timer / Alarm
- Check Wikipedia

*Some functions and services are not available in all areas.

Amazon Alexa Key

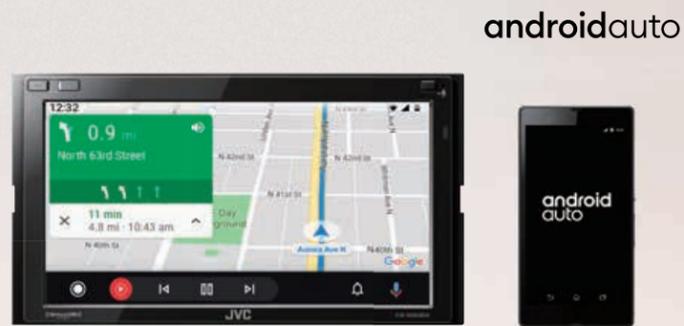

Amazon, Alexa and all related logos are trademarks of Amazon.com, Inc. or its affiliates.

Android Auto™ - Connect Wirelessly or via USB

Android Auto was designed with safety in mind. With a simple and intuitive interface and powerful voice actions, it's designed to minimize distraction so that you can stay focused on the road.

Some Features, applications, and services are not available in all areas. For details, see: www.android.com/auto

USB Mirroring for iPhone & Android

With Mirroring for JVC application installed on your smartphone, you can display the screen of your smartphone on the screen of the JVC receiver and listen to either the audio of your smartphone or current source of the receiver.

*Not all functions and applications are available.

iDatalink Maestro

Advanced Vehicle Integration

iDatalink Maestro RR (sold separately) enables the retention of the factory steering wheel audio controls, factory amplifier, secondary displays and can even display vehicle information (performance data, climate controls, battery voltage, etc.) when connected to compatible vehicles.

*Available features may vary depending on the vehicle. The iDatalink Maestro RR is sold separately by Automotive Data Solutions. To find an authorized dealer please visit <https://maestro.idatalink.com/>

Sound Optimization

High Resolution Audio

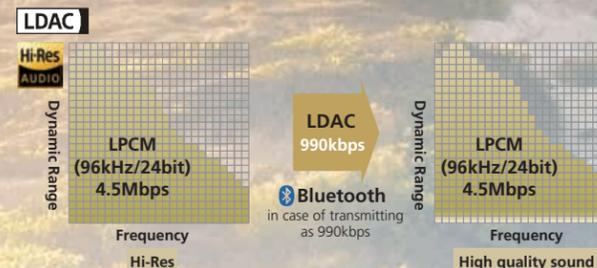

You can enjoy playback of 96kHz/24bit audio which contains about 3 times the musical information of music CDs (44.1kHz/16bit), or even 192kHz/24bit High-Resolution Audio files with their approx. 6.5 times data volume. With high sound quality approaching the original master recording itself, you will experience the presence and ambience of a tune the way CD simply cannot.

High-quality Bluetooth® streaming with LDAC™

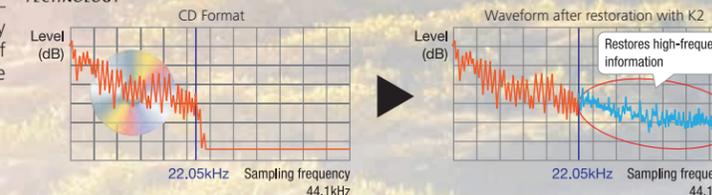

LDAC™ sends approximately three times more data (at the maximum 990 kbps transfer rate) than conventional Bluetooth® audio for superior wireless listening. Unlike other Bluetooth compatible coding technologies such as SBC, it operates without any down-conversion of the Hi-Res Audio content*1, and allows approximately three times more data*2 than those other technologies to be transmitted over a Bluetooth wireless network with unprecedented sound quality, by means of efficient coding and optimized packetization.

*1: excluding DSD format contents*2: in comparison with SBC (Subband Coding) when the bitrate of 990kbps (96/48kHz) or 909kbps (88.2/44.1kHz) is selected

K2 Technology for Enhanced Digital Sound Quality

K2 is a JVC original technology that reproduces the original master sound by expanding the frequency range. For example, K2 will expand the digital data of the audio CD recorded at 44.1kHz to 192 kHz. It is also possible to recreate the high-frequency range above 20kHz that is cut during the CD formatting.

Extra Convenience

JVC Remote Control App via Bluetooth®

Control the receiver's source directly from the smartphone using simple finger gestures with JVC's remote apps* now available for both iOS and Android. On select receivers, you can even customize your audio setting, and see detailed source information such as song title, artist name and album art etc. from the smartphone.

*For more information, visit the website for each app.

Built-in HD Radio Tuner

HD Radio is a Digital technology that allows a radio station to transmit more information in the same radio wave, enabling higher quality sound and additional content. HD Radio technology makes AM Stations have FM Station-like sound quality, while FM Stations are broadcast with CD-like sound quality. Unlike typical FM or AM transmission, HD Radio has crystal clear reception with low noise and no audio distortion.

DR Series Speakers Black Edition Superior, Reliable Performance

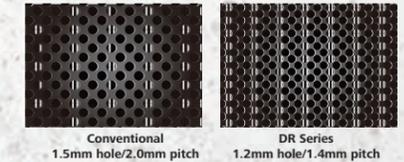

Combines high output sound and durability. Easily upgradable from factory-installed original speakers.

High Output & Durability

Carbon Mica Cone
Rigid and lightweight carbon mica material provides highly responsive, clear and undistorted sound reproduction.

Wide Grille Openings

Grille's opening ratio is 30% wider than the conventional model, enabling increased durability and clear sound.

Balanced Neodymium Tweeter

Provides detailed high range and smooth mid range. Installable vehicle types are greatly increased thanks to its shorter height.

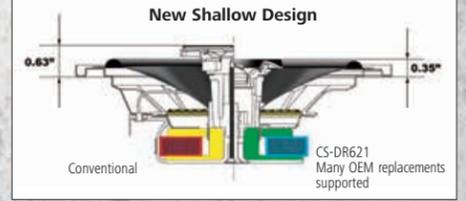

Hybrid Surround

Rubber Coated Cloth with increased mobility enables high efficiency and improved follow-up to audio signals.

Great Factory Replacement

Installable vehicle types are greatly increased thanks to its shorter height.

Small-Design Tweeter Cover
Newly developed small cover significantly reduces areas that interfere with the woofer cone. High-quality sound is assured.

DR Series 8" Compact Powered Subwoofer — Compact, yet Powerful

JVC's solution addresses the growing need to enhance bass in vehicles without enough space to install conventional subwoofers.

Rugged Design

Each part used is heat resistant to achieve high durability.

Voice coil with large diameter

Black absorber
Heat resistant cone
Black painted plate
Black painted yoke

Compact size for installation in various places.

drvn DF Series

DR Series Speakers — Powerful Sound & Tough Looking Design

Entry class model that enables powerful sound reproduction.

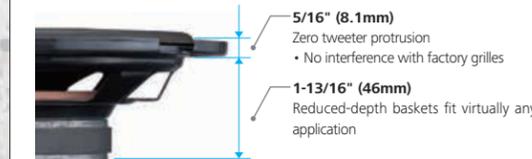

CS-DF620

Hybrid Surround
Rubber Coated Cloth with increased mobility enables high efficiency and improved follow-up to audio signals.

Great Factory Replacement (CS-DF620)

Installable vehicle types are greatly increased thanks to its shorter height.

5/16" (8.1mm) Zero tweeter protrusion
• No interference with factory grilles
1-13/16" (46mm) Reduced-depth baskets fit virtually any application

Large Magnet
